

This Church now has a Hearing Loop!

What is a hearing loop?

Hearing Loops allow people who wear hearing aids to directly receive the sound from the church's sound system in their own hearing aids. To hear better, change to the telecoil setting on your hearing device and enjoy. Please stop by and tell us what you think!

Do my hearing aids work in a loop?

If you wear hearing instruments you will need to find out if they have an activated telecoil or "T-coil", in order to benefit from the hearing loop in our church.

What if I don't have a hearing aid?

If you have difficulties hearing but don't have hearing aids, simply ask an usher for a special receiver and headset which works with the loop to bring clear sound directly to your ears.

Whoever has ears, let them hear.

Matthew 11:15

Have you had your hearing checked recently or would like to find out how to activate your hearing aids to use our hearing loop?

Contact your audiologist to make sure your hearing device is hearing loop ready!

This hearing loop was professionally installed by Assist2Hear.

Our goal is to serve as an advocate for the hearing loss community through education and professional installation of the highest quality hearing loop systems in the U.S.
