

Summer Math Requirements

Each rising 2nd grader will be required to complete 240 minutes of IXL over the summer. I know this sounds like a big number, but this breaks down to 30 minutes per week over an 8 week period of time. Students will be assigned activities to complete. We will be monitoring this periodically over the summer. If your student completes all of the tasks and you need more assigned, or wish to know how many minutes your student has worked up to a certain point, please feel free to email either myself jgamboa@allsaintsk8.org or Mrs. Ramirez nramirez@allsaintsk8.org and we can get back to you.

We are currently in the process of merging our IXL accounts with the Diocese so usernames and passwords will change. The good news is that they will remain the same from here forward. We will begin assigning activities the week of June 1st. Once this happens, we will send everyone an email letting them know that tasks have been assigned to everyone in IXL and what your new usernames and passwords are. Please keep IXL logins in a safe place since they will be used all summer.

Our hope with both our reading and math summer requirements is that we don't experience that summer slide where students fall back in their learning and we can hit the ground running in August and keep everyone challenged. Please let us know if you have any questions!

Thanks!

Jennifer Gamboa and Nicole Ramirez
